Sake, a product of Japanese
great nature and four seasons

日本の大自然と四季が育む酒

Climate and nature

The Kuma area, where Joraku Distillery is located, has a wide range of temperature differences, surrounded by mountains. The area is famous for deep and fantastic morning mist brought about by the basin shaped valley. The Kuma River, one of the most rapid streams in Japan, supplies the clear underground water with the area. This best combination of the climate and the nature contributes to JORAKU's premium quality.

自然

JORAKUが造られる球磨郡は四方を深い山々に囲まれ、昼夜の気温差が激しく、朝にはたびたび盆地特有の幻想的な濃い朝霧で覆われることで有名です。
また、日本三急流である球磨川の澄み切った伏流水を湛え、良質な酒のできる気候風土がそろっています。
